CSC 573 – INTERNET PROTOCOLS
PROJECT #1   FALL 2021

Aayush Indrapratap Singh, asingh48   **Nitish Pravin Talekar, ntaleka**

1.   IMPLEMENTING P2P-CI

Files:

Server.py	-	Runs Centralized Server
Client1.py	-	Runs Client Interface for 1st Client
Client2.py	-	Runs Client Interface for 2nd Client

Steps to Run:

1.   Run Server.py in Terminal on device:

```
python Server.py
```

2.   Change SERVER NAME in Client.py - Line 8 :

```
SERVER_HOST = #ADD SERVER IP ADDRESS HERE.
```

3.   Run Client1.py in Terminal on device:

```
Python Client1.py
```

4.   Run Client2.py in Terminal on device:

```
Python Client2.py
```

5.   Run Commands from displayed interface:

```
LOOKUP: Looks up specific RFC number on server
LIST: Lists all RFC of given version
LIST ALL: Lists all RFC on Server
ADD: Add new RFC to system
GET: Request RFC from Peer
QUIT: Close connection with Server
```
